GitHub: github.com/Tanishka-Rana-1

Email: ranatanishka2005@gmail.com

Mobile: +91-8219573738

SKILLS

Languages: Java, C++, Python, SQL

Frameworks: HTML, CSS, NumPy, Pandas, Matplotlib, Scikit-Learn, Seaborn

Tools/Platforms: Power BI, Excel, MySQL, MongoDB, PostgreSQL

Others: Data Structures & Algorithms

Soft Skills: Leadership, Problem-Solving, Teamwork, Consistency, Time Management

PROJECTS

Indian Weather Intelligence: Real-Time Weather & Air Quality Analytics | [GitHub](#)

Nov 2025 – Dec 2025

- Built a real-time environmental monitoring system using Open-Meteo Weather API with Python ETL pipelines and PostgreSQL, processing 17+ parameters (AQI, PM2.5, PM10, temperature, visibility) across 296+ cities.
- Created advanced Power BI dashboards with DAX-based health risk categorization, tourism scoring, and national benchmarking using ALL() and ALLSELECTED() for consistent global context and interactive drill-downs.
- Delivered end-to-end analytics including health impact analysis, tourism planning insights, and live city-level monitoring with best/worst city identification and trend analysis.
- **Tech:** Power BI, PostgreSQL, Python, DAX, ETL, Open-Meteo API, DirectQuery, Real-Time Data Pipeline

LinkedIn Job Market Analytics Dashboard | [GitHub](#)

Jul 2025 – Aug 2025

- Developed an interactive Power BI dashboard using 124,000+ LinkedIn job postings, building an end-to-end ETL pipeline with Python (Pandas) and Excel (Power Query) to clean, integrate, and normalize data from 8–9 sources.
- Implemented advanced DAX calculations for custom KPIs such as skill frequency by job role and experience–salary correlations, enabling granular analysis through interactive slicers and filters.
- Designed dynamic visualizations to analyze job market trends: salary distribution by location, in-demand skills (Python, SQL, Power BI), and top hiring companies.
- **Tech:** Power BI, DAX, Python (Pandas), Excel (Power Query), SQL (for data modeling)

TRAINING

Data Science and Analysis – Angaar Batch

Jun 2025 – Jul 2025

- Analyzed 124,000+ LinkedIn job postings using Python and SQL to clean and preprocess data; implemented predictive ML models including regression and classification techniques.
- Designed interactive Power BI dashboards to visualize job market trends and track key KPIs, translating complex datasets into actionable business strategies.

CERTIFICATIONS

Data Visualization Job Simulation | [TATA](#)

Sept 2025

Data Science & Analytics | [HP LIFE](#)

Jul 2025

Data Analytics Job Simulation | [Deloitte](#)

Jun 2025

Privacy and Security in Online Social Media | [NPTEL](#)

Apr 2025

ACHIEVEMENTS

GitHub Starstruck: Data-Analysis repository garnered 20+ GitHub stars and 8 forks, awarded the Starstruck achievement by GitHub.

HackerRank: Verified Problem Solving (Intermediate) skills on HackerRank, earning badges in C++ (3 Star), Java, and Python.

EDUCATION

Lovely Professional University

B.Tech – Computer Science and Engineering; CGPA: 8.32

Punjab, India
Aug 2023 – Present

Mount Carmel School

Intermediate; Percentage: 77

Palampur, HP
Apr 2022 – Mar 2023

Mount Carmel School

Matriculation; Percentage: 91

Palampur, HP
Apr 2020 – Mar 2021
